

I endorse the Petition for Rule Making, RM-11306, in its entirety, and especially the deletion of Part 97.221(c), which currently severely limits stations under "local or remote control" for digital protocols over 500 Hz.

Self-regulation does work and will continue to work if Amateur's are offered that opportunity. Rules that prevent us from advancing the radio art must be removed or relaxed if we are to develop systems and techniques beyond where we are today.

Lee Inman, K0QED
